## **U.S. CAD Relocates its San Diego Office and Autodesk® Authorized Training Center**

### ***New State-of-the-Art Facility Offers Clients Expanded Services and a More Advanced Training Environment***

**San Diego, Calif., Nov. 2, 2009** – U.S. CAD, Inc., one of the Western U.S.’s largest providers of computer-aided design (CAD) and building information modeling (BIM) consulting, training and support services, and the region’s largest Autodesk value added reseller, has relocated its San Diego, Calif., office to provide area clients expanded services and more advanced and comfortable training facilities. Conveniently located at 9707 Waples St., just off Mira Mesa Blvd., a few miles from the I-5 and I-805 interchange (not far from the previous location), the new San Diego office will enable U.S. CAD to better serve its customers in the civil, mechanical, architectural, building engineering, construction and geospatial industries.

“Our team is very excited to have moved into this new office space that offers so much more to both our customers and our staff professionals,” said U.S. CAD CEO Danny Counts. “Our new San Diego office will allow us to offer more solutions to our existing customers and extend our services to a larger range of clients and industries.

“In addition to being a world-class resort destination, San Diego has a dynamic business environment, which increasingly requires the kinds of specialized CAD- and BIM-related products and services that U.S. CAD provides,” Counts added. “We’re excited to deepen our presence in San Diego in order to help our customers ‘achieve more.’”

“By moving into this new San Diego location, in addition to representing Autodesk software, training and consulting, U.S. CAD brings our client base an outlet for BIM production services for design and documentation, as well as construction and coordination,” said Daniel Hebert, vice president of U.S. CAD. “In turn, clients will benefit from our many core strengths and capabilities. Wherever our clients are, they

now have new options for offloading production as an extension of their own production team.”

### **About U.S. CAD**

Based in Costa Mesa, Calif., U.S. CAD, Inc. (formerly L.A. CAD) is a major provider of computer-aided design (CAD) consulting, training and support services, and Autodesk software solutions. Specializing in the civil, mechanical, architectural, building-engineering, geospatial and design visualization industries, the company provides technical expertise and customized training to deliver superior customer solutions. Customers value U.S. CAD’s quality instruction from Autodesk Approved Instructors, and its flexible training options, including modular mobile training labs. With Autodesk Authorized Training Centers (ATC) at its Costa Mesa, Los Angeles, San Diego and Honolulu locations, U.S. CAD has become the Autodesk software provider of choice for many of the West’s leading CAD-related companies.
