

Autodesk® Navisworks® Manage Upgrade Promotion

Frequently Asked Questions for Customers

Autodesk® Navisworks® Manage software is a comprehensive review solution for analysis, simulation, and communication of project information. Multi-disciplinary design data created in Building Information Modeling (BIM), Digital Prototyping (DP), and process plant design applications can be combined into a single integrated project model. Interference management and clash detection tools help design and construction professionals anticipate and avoid potential problems before construction, minimizing expensive delays and rework. Navisworks Manage combines spatial coordination with the project schedule to deliver 4D simulation and analysis. Entire project models can be published and freely viewed in NWD and 3D DWF™ file formats.
