

FOR IMMEDIATE RELEASE

U.S. CAD™ Wins 2008 Autodesk® Platinum Club Award

Company Earns Top Honors for Achieving Highest Autodesk Sales Volume in U.S.

Costa Mesa, Calif., March 25, 2008 – U.S. CAD, Inc., the Western U.S.’ s largest provider of computer-aided design (CAD) services and products and largest Autodesk solutions reseller, announced its selection as a 2008 Autodesk Platinum Club award winner for achieving the highest Autodesk sales volume nationwide. To qualify for the award, U.S. CAD exceeded sales expectations in its architecture, engineering and construction (AEC) and its Geospatial solutions divisions. This award marks the sixth consecutive year the company has earned Autodesk Platinum Club honors.

The Platinum Club awards were developed by Autodesk to recognize the industry’s top-performing resellers in sales and customer service. The 2008 Platinum Club awards ceremony was held March 10, 2008, in Las Vegas. The winners were recognized in front of their peers and Autodesk senior management.

“Autodesk is proud to recognize the elite group of 2008 Platinum Club award recipients as the top performers in sales and customer service,” said Steve Blum, senior vice president of Americas sales at Autodesk. “Partners like U.S. CAD are continually raising the bar by helping our customers achieve competitive advantage with Autodesk’s advanced digital design technologies.”

“We are very proud to have received this award,” said U.S. CAD CEO Danny Counts. “Over the last few years, we have partnered closely with the architecture and engineering communities in the Western U.S. to increase their

understanding of how Autodesk technologies relate to sustainable design initiatives, 'green building,' and LEED certification, as well as improve overall productivity to deliver better design quality and increased value to our customers.

"It's gratifying to see our customers embrace Autodesk technology and help them successfully transition to these sustainable design solutions," Counts added. "We see the momentum around many Autodesk technologies continuing to build and are excited about the impact these technologies are having in the industries we serve."

About U.S. CAD

Based in Costa Mesa, Calif., U.S. CAD, Inc. (formerly L.A. CAD) is a major provider of computer-aided design (CAD) consulting, training and support services, and Autodesk software solutions. Specializing in the civil, mechanical and architectural design, building-engineering and geospatial industries, the company provides technical expertise and customized training to deliver superior customer solutions. Customers value U.S. CAD's quality instruction from Autodesk Approved Instructors, and its flexible training options, including modular mobile training labs. With Autodesk Authorized Training Centers at its Costa Mesa, Los Angeles, San Diego, Honolulu and Guam locations, U.S. CAD has become the Autodesk provider of choice for many of the West's leading CAD-related companies.
