FOR IMMEDIATE RELEASE

**L.A. CAD, INC. ACQUIRES AND IMPROVES KNOWLEDGE TRAX™
SKILLS ASSESSMENT AND TRAINING DEVELOPMENT PROGRAM**

***Customized, Modular Online Tool Helps Organizations Improve CAD-Related
Training to Achieve Greater Time- and Cost-Saving Efficiencies;
L.A. CAD, Inc. is now its Exclusive Provider***

Costa Mesa, Calif., May 22, 2006 – L.A. CAD, Inc., Southern California's largest provider of Computer Aided Design (CAD) solutions and largest reseller of Autodesk® solutions in the Western Region, has added the Knowledge Trax CAD-skills assessment and training development program to its growing portfolio of training services. Knowledge Trax is a personalized, modular program with online knowledge management tools that allows organizations to assess their employees' CAD-related skills, plan and track required training, and report results back to the training participant and the organization. L.A. CAD acquired Knowledge Trax from CorDax and is now the program's exclusive provider. L.A. CAD plans on furthering the development of Knowledge Trax in order to expand its capabilities.

Many design- and engineering-driven organizations spend considerable time and resources determining their employees' CAD skills and training needs, and employees are often grouped together for training in skills that only some require, or require to differing degrees. Knowledge Trax eliminates these inefficiencies and redundancies by targeting individual employees' training needs and allowing organizations to spend their training dollars more wisely by targeting these areas of inefficiency. This offers the greatest return on investment and improved productivity for the entire organization. It also allows an organization to maximize their time to focus on their core business.

“The acquisition of Knowledge Trax by L.A. CAD will improve the quality of training available to our customers,” said Danny Counts, CEO of L.A. CAD. “Knowledge Trax’s unique ability to capture knowledge gaps in the technology we use will allow L.A. CAD to offer more targeted training to our customers, which will raise the entire baseline level of knowledge within these organizations, enabling them to get the most out of their technology and education investments. It pleases us to know we are providing our customers with greater value to help them be more efficient and more profitable.”

Knowledge Trax provides organizations and their managers with 24/7 online access to individual participant and consolidated training activity reports and data, which can be customized to meet the organization’s needs.

Individual Knowledge Trax training participants are posed a series of questions in a user-friendly, graphical online interface. Their answers accurately determine their skill level in the “feature-set” areas within the technology they currently use -- drawing and editing, for example. The results allow L.A. CAD to offer companies a highly accurate assessment of their employees’ knowledge gaps and recommend modular training solutions that dramatically reduce companies’ overall training time and cost when compared to training everyone on everything, or not training anyone at all. L.A. CAD training solutions are available in several different ways including “live” e-learning, modular group training, project or task training, open enrollment training, 4-hour workshops, seminar style training, and more.

About L.A. CAD, Inc.

L.A. CAD, Inc. is the largest provider of computer-aided design (CAD) solutions in the Western Region of the United States, offering highly specialized consulting, training and support services for the civil design, mechanical design, architectural design, building engineering and GeoSpatial industries. The company’s honest approach, unmatched technical expertise, including its high number of Autodesk® Approved

Instructors and Implementation Certification Experts, have made it the Autodesk provider of choice for a vast array of top and rapidly growing CAD and CAD-related companies. L.A. CAD has Autodesk Authorized Training Centers located throughout Los Angeles, Orange and San Diego counties. For more information, visit www.lacad.com.
